

**Issue: Warfarin Dosage Chart**

*Raised by:* Various

*Background:* A variety of versions of Warfarin charts are used in different areas of the Branch. One authorised form is preferred.

*Discussion:* The various types of forms in current use were reviewed and the preferred features of each identified.

Two extra features were also recommended as worth adding to the form, including the use of legend providing accepted reference ranges, and the prompt to record any concurrent therapy of relevance to anticoagulant therapy.

*Consultation:* Rheumatic Heart Disease Unit

*References:* Nil

*Outcome:* A form has been developed and endorsed by the Best Practice Group and the Rheumatic Heart Disease Unit.

The new form should now be utilised and old versions discarded.
