URGENT ATTENDANCE AFTER-HOURS

For the second and subsequent patients attending on the same occasion, standard (non-urgent) after-hours items apply. If two patients are seen on the same day but at different times, then this must be noted on the Medicare claim “separate call-outs”.
- The urgent after-hours items can only be used where the patient has a medical condition that requires urgent treatment, which could not be delayed until the next in-hours period.
- For consultations at the health centre, it is necessary for the practitioner to return to, and specially open the consulting rooms for the attendance.
- For times and days these items apply, see table above.

NON-URGENT AFTER-HOURS ATTENDANCES

- These items are for medical services that are rendered after-hours in a consulting room, home, residential aged care facility, or institution (not hospital).
- Urgent attendance after-hours items (above) can only be used for the first patient, if more than one patient is seen on the one occasion. For the second and subsequent patients attending on the same occasion, standard after-hours items apply (see table over page).
- For times and days these items apply, see table above.
