Complementing the provision of the hard copy references, staff are able to access DoH [Library Services](#) - a 24/7 collection of evidence-based information resources to support clinical decision-making, research, education, and management for staff in the Department.

Not available through Library Services but particularly helpful to Primary Health Care remote staff is the [The Public Health Bush Book Volume 1: Strategies & Resources](#), 2007. NT Department of Health, NTG.

¹ These references contain approved clinical protocols for all Primary Health Care remote staff.
